## Claim Rejections - 35 USC § 102 and 103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-31 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Tachiwana et al (5,972,460), Speit et al (6,303,528), Kurachi et al (6,440,531) and Nakashima et al (6,387,510; 2002/0010066).

Tachiwana et al teach a glass composition for substrates to be used in magnetic disks including  $SiO_2$  61-75wt%,  $Al_2O_3$  10-22%,  $R_2O$  at least 14.1%, see column 3, lines 31-49.

Application/Control Number: 10/633,893

Art Unit: 1755

Speit et al teach a glass composition for substrates to be used in magnetic disks including  $SiO_2$  40-50.8wt%,  $AI_2O_3$  5-20%,  $B_2O_3$  0-5,  $R_2O$  5-12% and RO 4-20%, see column 2, lines 50-66.

Kurachi et al teach a glass composition for substrates to be used in magnetic disks including  $SiO_2$  63-70 mol%,  $Al_2O_3$  4-11%,  $R_2O$  at least 11 mol%, and RO 2-15 mol%, see column 3, lines 28-35.

Nakashima et al '510 teach a glass composition for substrates to be used in magnetic disks including  $SiO_2$  60-72 mol%,  $Al_2O_3$  2-9%,  $R_2O$  4-15%, and RO at least 2 mol%, see column 2, lines 45-56.

Nakashima et al '066 teach a glass composition for substrates to be used in magnetic disks including  $SiO_2$  40-59 wt%,  $AI_2O_3$  5-20%,  $B_2O_3$  0-8,  $R_2O$  5-12% and RO at least 2%, see paragraph 19.

It is well settled that when a claimed composition appears to be substantially the same as a composition disclosed in the prior art, the burden is properly upon the applicant to prove by way of tangible evidence that the prior art composition does not necessarily possess characteristics attributed to the CLAIMED composition. In re Spada, 911 F.2d 705, 15 USPQ2d 1655 (Fed. Circ. 1990); In re Fitzgerald, 619 F.2d 67, 205 USPQ 594 (CCPA 1980); In re Swinehart, 439 F.2d 2109, 169 USPQ 226 (CCPA 1971).

4. Claims 1-31 are rejected under 35 U.S.C. 102(a or e) as being anticipated by Ikenishi et al (6,818,576).

See Table 5, examples 27-30, Table 6, examples 31-36Table 7, examples 37-42. The claims are considered anticipated.

Art Unit: 1755

## Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl E. Group whose telephone number is 571-272-1368. The examiner can normally be reached on M-F (6:30-4:00) First Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Bell can be reached on 571-272-1362. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
